

CERTIFICATE OF COMPLIANCE

RoHS & REACH Compliance:

High-Tech Manufacturing Services (HTMS) states that all our products supplied and offered do not contain any hazardous substances as described by the European Union Directives, 2002/95/EC & 2011/65/EU.

Any possible unintentional trace elements would be in quantities less than 10ppm. These Hazardous RoHS Substances are identified as: Lead, Mercury, Cadmium, Hexavalent chromium, Polybrominated biphenyl (PBB), Polybrominated diphenyl ethers (PBDE), Pentabromodiphenyl ether and Octabromodiphenyl ether (OBDE).

HTMS supports the basic aim of REACH in improving the protection of human health and environment through the better and earlier identification of intrinsic properties of chemical substances. HTMS meets all applicable REACH requirements and is committed to providing our customers with information about substances in its products as required.

Under REACH, registration of substances which are used in the manufacturing of articles do not apply to HTMS's operations.

HTMS's products are 'articles' as defined by REACH Article 3(3) and do not release substances under their normal use. Suppliers of articles must provide recipients with information on Substances of Very High Concern (SVHC) if those are present above a concentration limit of 0.1% on an article level.

At this time, HTMS can assure its customers that our products do not contain any of the current listed SVHC's and are in full compliance with the EU REACH requirement.

HTMS is committed to meeting the needs of our customers and protecting the environment.
